## **LISTING OF CLAIMS**

A detailed listing of all claims that are, or were, in the present application, irrespective of whether the claim(s) remain(s) under examination in the application is presented below. The claims are presented in ascending order and each includes one status identifier. Those claims not cancelled or withdrawn but amended by the current amendment utilize the following notations for amendment: 1. deleted matter is shown by strikethrough for six or more characters and double brackets for five or less characters; and 2. added matter is shown by underlining.

- (Original) A method for manufacturing a molded woody article, comprising:
  compression molding a base material containing wood fibers, polylactic acid fibers and
  an inorganic filler at a temperature not less than a melting point of said polylactic acid fibers; and
  maintaining said molded base material at a temperature close to a crystallization
  temperature of said polylactic acid fibers for a desired period of time, thereby crystallizing the
  polylactic acid fibers.
- 2. (Original) The method for manufacturing a molded woody article according to claim 1, wherein the inorganic filler contained in the base material is dispersed into the polylactic acid fibers.
- 3. (Previously Presented) The method for manufacturing a molded woody article according to claim 1, wherein the inorganic filler contained in the base material is talc.
- 4. (Previously Presented) The method for manufacturing a molded woody article according to claim 1, wherein in the molding step, the base material is prepared such that the ratio of the wood fibers to the polylactic acid fibers is in the range of 7:3 to 5:5 by weight.
